

JUSTICE HEALS - PSYCHOSOCIAL CENTRES FOR REFUGEES AS HUMAN RIGHTS ORGANIZATIONS AND REHABILITATION NETWORKS

Bergbau-Museum Bochum 10th – 12th May 2023

Justice heals – psychosocial centres for refugees as human rights organizations and rehabilitation networks

BAfF and MFH Bochum invites you to the annual BAfF conference in Bochum from 10th May 2023 to 12th May 2023.

For more than 20 years, MFH Bochum acts according to the “justice heals approach”. Main component of this work which were published in Torture Journal (Volume 18, No.1, p. 38 – 50) is the international fight for justice, truth and reparation.

The theoretical framework for this work originates from activists in Latin America and their fight against violent dictatorships and impunity, while advocating for rehabilitation of survivors and their family members. Similarly influential to the work of “justice heals” was the strong engagement of organizations and therapists supporting the rehabilitation of Holocaust survivors. We are pleased to welcome several international guests from this field and discuss their work and inputs with organizations in Germany!

Central aim of this conference is to shed light on current developments in rehabilitation efforts for survivors of severe human rights violations. The focus will be on political conditions facilitating torture and crimes committed against refugees and migrants on their route to Europe and later on in host countries. In line with a holistic approach to rehabilitation, the conference will focus on the social, psychological, medico-legal perspective.

Application under: eveeno.com/297095508

Due to logistical reasons, participation without pre-registration within the registration period and payment of the fee on site are not possible.

organized by:

German Association of Psychosocial Centres for Refugees and Victims of Torture (BAfF)

The German Association of Psychosocial Centres for Refugees and Victims of Torture (BAfF) is the umbrella organisation of centres, facilities and projects for victims of human rights violations and political persecution. There are currently 47 psychosocial centers in the BAfF that are committed to the medical, psychotherapeutic and psychosocial care and rehabilitation of victims of torture and other serious violations of human rights. The BAfF represents the general concerns of the treatment centers at the local, regional, nationwide and international level vis-à-vis the public and political decision-makers.

Through the projects and activities of the BAfF, we bundle the forces of the German treatment centers for traumatized victims of torture. We promote the professional exchange of experience and knowledge among the centers, represent common concerns in terms of improving the living conditions of survivors of politically motivated violence and develop quality standards for the appropriate treatment of traumatized refugees.

Medizinische Flüchtlingshilfe Bochum (MFH)

Medical Care Service for Refugees (MFH) is a non-religious, politically independent socio-medical and psychosocial Human Rights Organization. Its general aim is to improve living conditions of survivors of torture and other severe human rights violations. With its funding in 1997, MFH has dedicated its activities to provide medical assistance and psychosocial support to traumatized refugees. Since 1998, MFH is running a therapy center for survivors of torture, cruel treatment and severe human rights violations. Since 2008, MFH is one of three centers in Germany accredited by the IRCT as a therapy center for survivors of torture.

The work is based on a holistic interdisciplinary approach integrating psychotherapy, medical treatment, social and legal support as well as advocacy for Refugees and Torture Survivors. Among others, MFH is especially committed to the implementation of the Istanbul Protocol in Germany and the fight against impunity of torture and other severe human rights violations in the frame of its worldwide network „Justice heals“.
